## **Computer Animation 90 | Nadia Magnenat-Thalmann | Springer**

Computer Animation '90, the second international workshop on computer animation, was held in Geneva, Switzerland, on April 25-27, 1990. This book contains invited papers and a selection of research papers submitted to this workshop. The contributions address original research as well as results achieved in a number of fields of computer animation including scientific visualization, human

## **Computer animation - Wikipedia**

Computer animation is the process used for generating animated images. The more general term computer-generated imagery (CGI) encompasses both static scenes and

## **Computer Animation - Topic - YouTube**

Computer animation is the process used for generating animated images. The more general term computer-generated imagery encompasses both static scenes and dy

## **Computer animation**

Computer animation is the art of creating moving images via the use of computers. It is a subfield of computer graphics and animation. Increasingly it is created by means of 3D computer graphics, though 2D computer graphics are still widely used for low bandwidth and faster real-time rendering needs. Sometimes the target of the animation is the computer itself, but it sometimes the target is
