Large Hadron Collider - Wikipedia

The Large Hadron Collider (LHC) is the world's largest and most powerful particle collider, the most complex experimental facility ever built, and the largest single machine in the world. It was built by the European Organization for Nuclear Research (CERN) between 1998 and 2008 in collaboration with over 10,000 scientists and engineers from over 100 countries, as well as hundreds of universities and laboratories.

The Large Hadron Collider and the Frontier of Physics

The Large Hadron Collider is a scientific instrument that lets physicists create and measure the properties of the elementary particles of matter.

Hadron Collider Physics 2002 - Proceedings of the 14th ...

Hadron colliders probe physics at new energy frontiers and search for new particles and forces. In addition, hadron colliders now provide also an
